

Fifth Inter-Association Workshop

Paris | 23.11.2016

Stefano Proietti, ISINNOVA

Activities of the Biogas Associations

- **Ad-hoc Inter-association** workshops that will be held alternately in each BIOSURF country (each six-months): to provide, mainly to stakeholders of the hosting association, **updates** on the entire project and on the **activities** of the other associations within the project.
- **6 general workshops** during the project duration with focus on technical and non-technical topics; participation is on a voluntary basis, and can change overtime;
- **One national conference** per country, gathering all main national stakeholders; opportunity to exploit project results on a larger and strategic perspective through the involvement of national decision makers and investors;
- **Interaction** with existing local, national and EU networks and associations through a broad range of modalities, e.g., they will receive the BIOSURF products (deliverables, folders, newsletters, etc.), the BIOSURF partners will participate to their events and vice versa.
- All meetings and workshops will be evaluated by means of a **short evaluation** form to the participants.

THIS SESSION AIMS
TO PROVIDE ...

- ... an open window on the entire project
- ... an insight on the activities
- ... an open discussion on priority topics
- ... a transfer of experiences, and
- ... solutions to common problems

HOW DOES IT WORK?

- There are three consecutive sessions (around **40** minutes each);
- The three “moderators” will steer the discussion and summarize the outcomes to the audience at the end of the session

ETIQUETTE

Speak your mind and heart!

Listen to understand!

Link and connect ideas!

Contribute your thinking and expertise!

Focus on what matters!

Listen together for patterns and insights!

Thank you for your attention!
